

# CT & MRI

## Gold Standard technologies

### SUPRIA:

Hitachi's latest CT technology is launched to the veterinary market with the Supria 16ch CT, giving outstanding image resolution in a compact design.

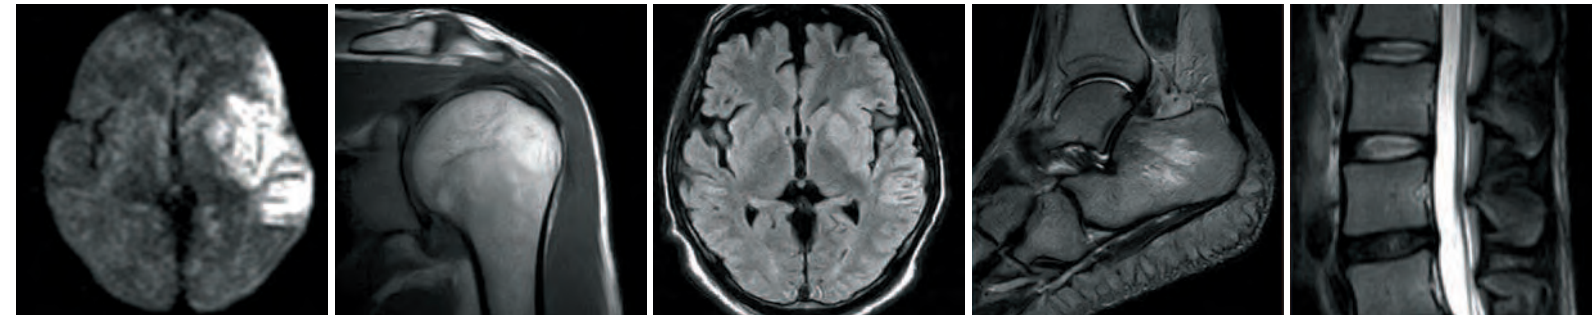

Hitachi CT technology can improve veterinary diagnostic capability as well as drive practice business development.

### Key Features:

- Outstanding image resolution – Intelli IP, advanced technology to reduce noise and artefacts - providing outstanding image quality
- High speed scanning – less than 1 second rotation with the latest 3D reconstruction algorithms - provides rapid coverage for precision imaging
- Easy operation – user friendly graphical interface for fast workflows
- Wide range of application packages for specialist requirements
- Wide bore – 75cm gantry bore for large patients (large dog, equine extremities)
- Compact design – small footprint, CT room only 2.8m x 4.3m
- Flexible purchase packages from Hitachi capital to suit practice requirements
- Hitachi aftersales support

For full technical specification go to [www.celticsmr.co.uk](http://www.celticsmr.co.uk) or call 0800 279 9050

### Hitachi - Invest in the best

Hitachi is the world leader in MRI technology, developed over 30 years and now with over 7000 installations worldwide. Hitachi have two systems that are particularly suitable for veterinary practice. Both systems have open, single column construction, allowing greater patient access - ideal for larger dogs and equines.

### Key Features:

#### Aperto Lucent:

- Installations at leading veterinary referrals – Dick White Referrals, Davies Veterinary Specialists, Northwest Surgeons

#### Aris light:

- Recently introduced to the veterinary market
- Outstanding resolution from Hitachi magnetic current technology
- RADAR – motion reduction capability using radial scanning technology to mitigate motion artefacts
- Non contrast MR angiography
- High contrast 3D sequences at high spatial resolution
- User friendly interface that's easy to use and fast workflows
- Customised protocols for specialised procedures
- Low running costs combined with an attractive initial investment scheme accelerates your MRI business and offers excellent return on investment and practice growth
- Reduced building construction costs and quicker installation times due to compact design and advanced shielding technology
- Hitachi sentinel practice support – with 24/7 monitoring ensures your MRI system is kept operating optimally

To find out how Hitachi MRI technology can improve the diagnostic capability of your practice and develop your business please contact us on 0800 279 9050 or visit [www.celticsmr.co.uk](http://www.celticsmr.co.uk)
